BYU Office of Information Technology
Chris Sears
Provo Utah

Chris Sears,

I've had a passion for software development since I was in middle school when my friend and I programmed our first video game called TRESCU. I'm writing to express my overwhelming interest in the Software Developer position that was posted on December 21st 2018. I know that there must be many applicants and recognize the tough choices you will have to make in selecting individuals to fill this position. I am willing to do anything you may need to help make your job easier as you get to know me and my qualifications better.

As a Utah County native and true Cougar fan, I know I would be a great fit with the other highly motivated team members in the OIT department. I would love to meet with you to discuss my qualifications for this position which include my strong communication and time management skills. I am also proficient at C++, Java, JavaScript, HTML, CSS, AJAX and MySQL. While these skills may not match exactly what you need, I want to assure you that I am a quick study and can learn any additional skills as needed.

For the past 11 years I've worked for Comcast as a cable technician while going to school to prepare myself for just this type of opportunity. I would be thrilled to join you in a work environment where there is a mutual respect among a group of people who share the same vision and mentality.

I'm available anytime from 9 AM to 9 PM to answer questions. You can contact me via cell or email. My phone number is 801-494-7232, and my email is carrick.chris@gmail.com. I genuinely look forward to meeting you.

Sincerely,

Chris Carrick
